How: C/BTF should get appropriate OL components together in yr-end review, i.e. PD/PHS/CONFISHB/INSS.

26 June 1986

MEMORANDUM FOR: Deputy Director for Administration

FROM:

Director of Logistics

SUBJECT: Report of Significant Logistics Activities for the Period Ending 25 June 1986

1. Events of Major Interest That Have Occurred During Preceding Week:

this report
as best
we can.*

~~SECRET~~

* c. OL reports that upcoming road and parking lot (North) construction at the Headquarters compound will be accomplished in four phases:

(1) The new roadway engineered along the building perimeter.

(2) The first third of North Lot, starting at A lane, to begin mid-September.

(3) The second third of North Lot, to begin mid-October.

(4) The remainder of the North Lot to begin mid-November. []

The rerouting of traffic at the Route 123 Gate has been rescheduled for 30 July. A Headquarters Notice will be published with the details. []

* d. On 23 June, the Chief, New Building Project Office, OL, met with the Traffic Advisory Committee and local citizen groups and other affected governmental units to review the 60-percent engineering design proposed for Route 123 Roadway Improvement Program. In general, the design was approved with the scheduling of a separate meeting on 1 July for those eight or nine homeowners directly affected by the proposed design options. []

e. The Deputy Chief, Procurement Management Staff, OL, and the Chief, Procurement Management Staff, DS&T, met with representatives from Coopers and Lybrand to give oral and written feedback on their draft report on Agency procurement. A final report is expected from Coopers and Lybrand by the end of July. []

* f. OL reports that the Polygraph Division renovation on the third floor of [] is essentially complete except for a few punch list items and a snag in obtaining an occupancy permit. The Fairfax County Fire Department maintains that the Agency-installed smoke detector alarms for the communications equipment room and Wang room must be connected to the building alarm system. The Safety Division, OMS, maintains it is not required to connect the two panels because the Agency's alarm is not a county-required alarm system. The Fairfax County Government has informed the fire department not to press the issue. []

j. In response to an Office of Security (OS) request, results of an evaluation of several copier models were detailed in a memorandum from OL. This evaluation was conducted in support of the plain text processing equipment selection for Agency [redacted] Transportability, user maintainability, copy quality, and machine speed are characteristics being evaluated. [redacted]

* 1. Work is continuing on the motion picture of the U-2 project being produced by OL. The original motion picture camera footage, which was generated at the Smithsonian Institution's Air and Space Museum, was converted into a work print for the making of duplicates this week. The final printing and release is scheduled for the first week in July.

25X1

m. OL reports that the Agency couriers entering the Treasury Building will have to possess Treasury Building badges or be processed as visitors. CIA courier credentials will no longer be honored for immediate admittance. A listing of 28 senior-level couriers was provided to the Treasury Security Office, but a limit of nine was imposed. Courier runs are made twice daily, Monday through Friday, and once on Saturdays. Afterhour runs are frequently made to deliver cable traffic to the Treasury Watch Office. Couriers not possessing access badges must wait in line and be processed as visitors, which may take anywhere from 20 to 40 minutes. This has disrupted the courier schedule and has impacted on the ability to provide timely service. The OL Security Staff has been asked to intervene on our behalf to request additional badges from the Treasury Department.

25X1

n. OL reports that Phase II of the Counterterrorist Center (CTC) project, 2G corridor, Headquarters Building, which was scheduled for completion on 27 June, was, in fact, completed on 21 June. The overall CTC project completion date is ahead of the 1 August schedule.

25X1

* o. The gallery of framed photographs and signed comments of presidents under which the Agency has served has been temporarily removed by OL for restoration.

25X1

p. OL has awarded a contract to IBM Corporation, in the amount of \$899,127, for the purchase of 108 IBM 3270 personal computers and related peripheral equipment.
